

HREC

Section IV

Maintenance of Health Records Upon Mobilization

5-30. Health records of deployed soldiers

a. HRECs of deployed soldiers. HRECs of deployed soldiers will not accompany them to combat areas. When processing soldiers for deployment, the MTF and DTF will audit each soldier's HREC and record essential health- and dental-care information on DA Form 8007-R. DA Form 8007-R is a single-page document that will be prepared for every soldier in the continental United States and outside the continental United States. DA Form 8007-R will be locally reproduced on 8 1/2- by 11-inch paper. A copy for reproduction purposes is located at the back of this regulation. DA Form 8007-R should be initiated and/or updated during record screening (para 5-24b(2)(g)). DA Form 8007-R is intended for use until an electronic device that stores medical or dental, personnel, and finance data is fielded. The preparation and use of DA Form 8007-R is applicable as well to civilian employees who may accompany deploying units. Units in the continental United States and outside the continental United States are encouraged to use DA Form 8007-R during training exercises. (See also para 5-24.)

(1) If an HREC is not available, DA Form 8007-R will be completed based on soldier interviews and any other locally available data. An HREC may not be available for most Individual Ready Reserve, Individual Mobilization Augmentee, and retired personnel because these HRECs may remain on file at the USARPERCEN.

(2) The completed DA Form 8007-R will be provided to the soldier's command, or to the soldier if an individual replacement, and then handed off to the MTF in the area of operation responsible for providing primary medical care. That MTF will maintain DA Form 8007-R in an **outpatient field file** for reference as needed. The field file will consist of, in part, DA Form 8007-R and possibly SF 600, SF 558, SF 603, or DD Form 1380.

(3) The soldier's field file may be managed as a "drop" file (forms not attached).

(4) MTFs and DTFs at the mobilization site(s) will follow the procedure in AR 640-10 for incorporating the HREC into the MPRJ.

b. Forwarded deployed force. If time permits, follow guidance in a(1) and (2) above. If not, consolidate HREC in-country, and process when time permits.

c. Limited contingency operations. Retain the HREC at the MTF and DTF providing primary care. If the servicing primary care facility closes, forward the HREC to the MTF or DTF indicated by the servicing MEDDAC and DENTAC. If full mobilization occurs, follow guidance in a(1) and (2) above.

d. Units that do not process through a mobilization station before deployment or otherwise do not have access to an MTF or DTF. These units will follow the procedures in b above.

5-31. Preparation of health record forms

- a. DD Form 1380. Instructions for preparing DD Form 1380 are provided in chapter 9. When DD Form 1380 is put into the HREC, it will be mounted on SF 600. To mount it, staple only along the top margin so that no entries on SF 600 are hidden and so that both sides of DD Form 1380 can be read.
- b. SF 600. SF 600 is prepared the same during combat conditions as during peacetime. (See para 5-16.)
- c. SF 603A. Each encounter for dental care in an operational setting will be recorded on SF 603A. To ensure legal documentation and quality-care continuity, provide complete, accurate, and clear information so that the forms can be returned to the record custodian and so that the information can be transposed to the permanent record. At a minimum, the name, SSN, service branch, unit (for example, division or separate brigade, company, and battalion), and homebase should be included in the identifying information. The provider's name and rank, and the field unit providing the care should be clear. The date, chief complaint, indication that medical history was reviewed, examination and test results, diagnosis, treatment, prescriptions, and disposition (including mode of transportation, if pertinent) will be included on the SF 603A, section 17.

5-32. Use of field files

- a. If a soldier's primary MTF changes, the field file should be moved to the gaining MTF.
- b. If a soldier requires admission to the hospital, every attempt will be made to forward the field file. The file will be returned to the soldier's primary MTF if disposition is "return to duty."

5-33. Operation after hostilities cease

- a. Field files will be integrated with the HREC after demobilization at home station or mobilization stations. Field files will be forwarded to USARPERCEN for those soldiers whose HREC is maintained at USARPERCEN.
- b. Each CONUS MTF must request records from USARPERCEN for those soldiers who remain on active duty and are assigned for support upon demobilization.

Until the new four-part folder is fully assimilated into the system (see fig 5-2), the following order will be used for forms of the HREC using DA Form 3444-series jackets.

All forms should be filed in an upright position on both sides of the folder.
